

## Computer & Satellite Installation - Professional Audio Video Solutions Home Theater Speakers

The Yamaha YST-SW225 120-watt subwoofer boasts an 8-inch multi-range driver and Yamaha's QD-Bass and Advanced YST II technologies, the subwoofer adds a deep, powerful bass response to your favorite movies and music. QD-Bass technology employs down-firing drivers and square, pyramid-shaped reflective plates to radiate the sound efficiently in four horizontal directions, ensuring dynamic power and a smooth frequency response regardless of the subwoofer's location. Advanced YST II technology, meanwhile, optimizes the speaker impedance to create more stable, energetic, and accurate low-range tones.

The high-performance tweeter in the NS-M225 features a dome made of an aluminum-magnesium alloy, with a DC-Diaphragm (integrated diaphragm and voice coil). The tweeter is extremely light to minimize loss yet is highly durable. It is capable of reproduction all the way up to 50kHz, which is rare for a 3cm dome tweeter. Highs are crisp and clear even at high power levels. The precision-constructed cabinet has a surface of high quality material. Its shape is designed to reduce diffraction and standing waves, ensuring you get the quality sound you want, when and where you want it.

The Yamaha NS-225F 2-Way Bass-Reflex Tower Speaker is a sleek, attractive addition to your home theater entourage. The high-performance 1.12-inch tweeter in the NS-225F features an aluminum-magnesium alloy dome with a DC-Diaphragm (integrated diaphragm and voice coil). It is capable of sound reproduction all the way up to 50 kHz, which is an outstanding range for a three-centimeter dome tweeter. The speaker shape is designed to reduce diffraction and standing waves to bring you a clear, true sound.

Complete your home theater system with the high-performance Yamaha NS-C225 center channel speaker. Boasting dual 3.12-inch polymer-injected mica diaphragm (PMD) cone woofers and a 1.12-inch aluminum magnesium dome tweeter, the speaker reproduces dialogue at the peak of clarity--an essential function when watching movies. Adding to the audio's warmth is the luxurious silver wood-finished cabinet, with a slim, precision shape that prevents standing and diffracted waves. As a result, the speaker creates a clear, accurate sound stage that evokes the high-end audio at commercial movie theaters. The NS-C225 is even capable of reproduction all the way up to 50 kHz, a rarity for models with tweeters of this size.

## Computer & Satellite Installation - Professional Audio Video Solutions Home Theater Speakers

The PS-10 powered subwoofer adds rich, exciting bass to today's music and movie soundtracks with its thunderous, tight, clean bass. Finish comes in Black Wood Grain with a Black Grille Cloth .

This speaker boasts a 3.50" MMD midrange and a 0.75" MMD tweeter--with an acoustical waveguide for a wider, more even high-frequency response--housed in a high-style, brushed, extruded aluminum acoustic suspension enclosure inspired by Infinity's premium Prelude Series. This all-metal enclosure provides an extremely rigid structure, virtually eliminating cabinet resonances.

The CS 60 is a 2-way in-wall speaker for use in a wide variety of applications, from stereo and whole-house music systems to complete home theaters. The CS 60 incorporates a pivoting tweeter that allows you to aim the tweeter towards the listening area for great sound anywhere in the room. The white grilles and frames are paintable and allow the speakers to blend into any decor.

The Infinity Beta C250 center channel speaker delivers accurate performance with dramatically reduced distortion for incredibly lifelike sound and dialog. The Infinity Beta C250 also features an improved tweeter that delivers extended high-frequencies out to 40kHz. Perfect for SACD or DVD-Audio recordings. The tweeter is mounted in a patent-pending Constant Acoustic Impedance waveguide for improved high-frequency dispersion anywhere in the listening room.
