

Computer & Satellite Installation - Professional Audio Video Solutions DVD Player/Recorders, High Def Player and 5 disc Player

SD-6000 - Toshiba

1080p Upconversion is designed to improve HDTV viewing and deliver a new level of video performance. Use the convenient HDMI connection to transfer uncompressed digital video and multi-channel audio to your home theater system. Its multiformat playback capability lets you enjoy high-definition audio and video in DVD-/+R, DVD-/+RW, VCD, SVCD, DivX, CD-R and other playback options. HD JPEG lets you view megapixel images in enhanced resolution, and the super-slim chassis' attractive design will complement the look of any home entertainment setup.

SD-4000 - Toshiba

TOSHIBA SD-4000 Progressive Scan DVD Player. Video Upconversion displays a pure digital signal at 720p or 1080i, matching the resolution of the HD display and thus eliminating signal degrading A/D-D/A conversion. Multiformat playback capability now includes DVD minus/ plus R, DVD minus/plus RW, VCD, SVCD, DivX, CD R, CD RW, MP3 and WMA playback for flexible playback options. HD JPEG provides the ability to view megapixel images in their enhanced resolution when using HDMI and an HD display device. New Super Slim, 40mm chassis height is combined with a high gloss black acrylic panel with attractive silver accents and a bright front display to complement the latest TV designs.

D-R400 - Toshiba

Toshiba's D-R400 DVD Recorder with 1080p Upconversion takes your existing DVDs and does more with them. It complements today's best high definition TVs, with video upconversion up to 1080p via HDMI. Record your favorite TV shows to DVD +R/+RW and -R/-RW, and Auto Finalize (with undo) records at the end of a timer or a disc - simplifying the recording process.
